ORNAMENTAL SHRUBS

Here is some of the very finest of all landscape material. It is hard to imagine home grounds well planted without the liberal use of flowering shrubs to bridge the gap between large trees and low-growing perennials and other plants.

Burr shrubs are 2-year-old, healthy stock with excellent root development. They have been cut back at one year to promote branching. All shrubs are graded strictly in accordance with the standards set up by the American Association of Nurserymen.

HEDGE PLANTS

Neat hedges give a well-cared-for look to any property. They serve to separate various sections of the garden as well as give privacy and protection.

VINES

By using vines it is often possible to screen undesirable buildings and views—to correct errors of either man or Nature. The foliage provides a lacy covering for arbors and fences and when the blooms appear they make a beautiful picture indeed.

ROSES

All Burr Roses are budded on Multiflora, which our experience has indicated to be the hardiest rootstock. The plants have been fertilized at the proper time, well cultivated and dusted weekly during the growing season. Multiflora is budded low to make a short shank. All Roses are graded according to the standards of the American Association of Nurserymen.

ORNAMENTAL TREES

Shade and flowering trees are an absolutely essential part of every landscaping job. Their foliage, bloom and berries make them interesting and handsome at all seasons. They thrive in any ordinarily good soil and increase in beauty with the years. Trees will add immeasurably to the satisfaction to be derived from any property, to say nothing of the money value.

EVERGREENS

Beautiful evergreens of various shapes, sizes and shades combine well with other trees and shrubs. They are indispensable in foundation plantings and as lawn specimens, for they are distinctive and always colorful. In winter when most of the landscape is bare and dull the evergreens hold out the hope of another growing season; they never "let you down."
